

Fiat S.p.A. named to Dow Jones Sustainability Indices World and Europe for fifth consecutive year

As continued recognition of its leadership in sustainability, it was announced today that Fiat S.p.A. has been included in the prestigious Dow Jones Sustainability Indices (DJSI) World and Europe for the fifth consecutive year. The company received a score of 89/100 compared with an overall average of 61/100 for companies in the Automobiles sector evaluated by RobecoSAM, the specialists in sustainable investment.

The Group's economic, environmental and social performance place it among the world's leading companies: membership in the DJSI World and DJSI Europe equity indexes is limited to companies judged best-in-class when compared with the majority of their peers based on selected sustainability criteria. For the DJSI World, 31 Automobiles companies were invited to participate in the evaluation process with only 3 being admitted to the index. For the DJSI Europe, 7 companies were invited to participate, of which 3 were admitted.

"Despite an increasingly competitive global landscape the Group has maintained its commitment to responsible leadership, recognizing that we have the moral duty to take an active part in building the future of our organization and of society as a whole. By promoting a culture of responsibility we give greater purpose to the profitable enterprise we seek to create" said Sergio Marchionne, CEO of Fiat S.p.A..

The Group achieved the maximum score in several key areas of the analysis conducted by RobecoSAM: in the environmental dimension, for its climate change strategy and environmental policies and management; and, in the social dimension, in the areas of human capital development and management, as well as occupational health and safety. The maximum score was also received for innovation management together with best score in the industry for social reporting and supply chain management.

During 2012, the Group made considerable progress in providing sustainable mobility solutions, reducing environmental footprint and positively impacting society, as illustrated by:

- Fiat brand leadership, for the sixth year in a row, for the lowest CO₂ emissions among the best-selling brands in Europe at 119.8 g/km
- Launch in the U.S. market of the zero-emission Fiat 500e electric vehicle
- Fiat Group leadership in Europe for natural gas vehicles, with more than 70% market share and 10 models offered, the broadest range of any auto manufacturer
- First automaker in North America to offer a factory-built compressed natural gas pickup, the Ram 2500 Heavy Duty CNG

- Automotive Lean Production Award given to the Pomigliano d'Arco plant in Italy and, recently, also to the Bielsko Biala plant in Poland. In addition, the prestigious Gold level in World Class Manufacturing was awarded to the Bielsko Biala plant in 2012 followed by the Pomigliano d'Arco plant earlier this year
- Continued reduction of the environmental footprint at plants worldwide, including a reduction of 230,000 tons in CO₂ emissions and 2 billion m³ of water saved
- €21 million committed to local communities in need through initiatives aimed at fostering economic, social and cultural development, as well as several engagements worldwide to strengthen the relationship with stakeholders and business partners through dialogue on sustainability issues

Fiat S.p.A. is also a member of numerous other leading indexes including: Euronext Vigeo Europe 120, Euronext Vigeo Eurozone 120, ESI Excellence Europe, STOXX Global ESG Leaders, STOXX Global ESG Environmental Leaders, STOXX Global ESG Social Leaders, STOXX Global ESG Governance Leaders, ECPI Euro Ethical Equity and ECPI Emu Ethical Equity, FTSE ECPI Italia SRI Benchmark, FTSE ECPI Italia SRI Leaders and MSCI ACWI Index.
